It is a unique energy management software tool, both as to cost and ease of use, which helps its users with energy efficiency and reduction of energy costs. myENERGIS is a tool with the value of professional software developed for industry that is that can be understood and used by everybody.

## CASE STUDY

***Golf and Country Club with 18 holes  
and accommodation facility  
with maximum demand of 50 kW  
and annual energy bill around \$70,000***

### Goals

- HVAC optimization
- Reduction of energy consumption by 10 %

### Approach

- myENERGIS implementation supporting the following business processes:
- ENERGIS implementation supporting the following processes:
  - Real-time data acquisition from 2 utility meters and 4 sub-meters
  - On-line calculation of 2 KPIs
  - On-line HVAC and lighting monitoring
  - Controlling of 2 cost centers
  - On-line warning about non-standard values
  - Improvement of energy purchasing process

### Benefits

- Improvement of HVAC efficiency by 60 %
- Reduction of energy price
- Reduction of power costs by \$25,000
- Investment payback – 2 months

**25**  
YEARS OF  
EXPERIENCE

**\$ 1.5B**  
OF ENERGY  
SAVINGS

myENERGIS offers standardized interface, forecasts and reports. It is customizable based on the type of meters, their amount and customer's mood.

myENERGIS is a pre-paid web service accessible from any internet browser.

# myENERGIS For You

## MAIN FUNCTIONS

- Data collection and integration from utility meters, smart meters, data loggers, SCADA, facility management systems, data archives, ERP, web services, handheld terminals, mobile apps
- Data validation
- Meters administration
- Monitoring, targeting and warning
- Energy portfolio management
- On-line demand control
- Planning, reporting and benchmarking
- Integration of HVAC, lighting and access control systems
- Local power generation control
- Micro grid operation control

## FEATURES

- Collects and provides data in real time
- Supports various types of meters
- Turns energy data into actionable information
- Clearly displays the wanted information via standardized interface
- Indicates efficiencies
- Offers customized reports and benchmarking
- Sends instant alarms (to smart phone, tablet, computer)

## TARGET CUSTOMERS

- Supermarkets
- Restaurants
- Bakeries
- Hotels
- Landlords
- Municipal utilities
- Regional utilities
